

Cladding Bricks

Sandy Engineer Cladding

Copper Red

Code
CSE-2

Specifications

Length	Thickness (T)	Height	Weight	Water Absorption
218 mm	68 mm	21 mm	0.5 Kg	< 12%

Cladding is made from Terracotta clay which is naturally red and spread natural aura in the surrounding. It gives peace to eyes. With the mixture of different types of natural colour clay and passing through the machine under a specific process, it produces the copper effect with longer durability for years. The effects on cladding remains unchanged for years.

Features

- Random Surface Textures
- Excellent Strength
- Earthquake Resistance
- Cost Effective
- Antique Look
- Beautiful Colour Variations
- Excellent bonding with Mortar / Adhesive
- Fire Proof
- Acoustic Performance
- 100% Natural
